

Technical Data Sheet

AF-815

Ingredient Silicone oil and hydrophobic particles of water emulsion

Warranty 6 months (kept in a cool, dry place at room temperature)

Applications AF-815 is used in

- General industrial wastewater treatment, such as paper mill wastewater, printing and dyeing plant wastewater
- Ore flotation process
- General general defoaming

Features

- High product content, easy to dilute
- Strong alkali and acid resistance
- Good versatility, fast defoaming and lasting defoaming ability

Physical indicators

Exterior White or yellowish milky liquid

Solid content (39-41) %

pH value 6.5-9.0

Viscosity, 25°C 2000-8000mPa.s

Instructions

- It can be used directly or diluted to a low content.
- Can be diluted directly with water, but need to be used immediately, if the dilution needs to be stored for a certain time, you can consult our company, our company will provide professional dilution method.
- The addition amount is generally 10~1000ppm, and the optimal addition amount is determined according to the actual situation on site.
- The addition point is generally selected where the defoamer is easily dispersed, and can be continuously added by a metering pump

Precautions

- There are no fatal or harmful ingredients to the human body, but try not to touch it directly or use it if it accidentally gets into the eyes, rinse with clean water
- Storage at room temperature (5-40°C), away from direct sunlight

- Refer to the product' s Material Safety Data Sheet (MSDS) before use
-

Usage

- Not for human injection

restrictions

- This product is not tested or represented as suitable for medical or pharmaceutical use
-

Package

- 25kg/200kg plastic drum or 1000kg IBC drum
-
